PSP (Personalized Safety Plan)

Police officers work with victims to **increase their self-protection**.

Currently, these plans are available in Spanish, as well as:
English French German Romanian Portuguese Chinese Arabic Russian

Sign language through videos so that victims can access them through the **capture of a QR code** from their mobile phone and thus reach the population with different abilities linked to hearing difficulties.

Easy-to-read version, to make information accessible to people with reading comprehension difficulties and people with intellectual disabilities of different degrees

The PSP is a **strategy that has been successfully tested** in Spain as well as in other neighbouring countries, which represents an added value for the protection of the victim and complements the mandatory police action.

Protection of personal data
